

VISITOR'S HANDBOOK

WELCOME TO ORWAK

At Orwak we have successfully avoided serious workplace accidents and as our visitor, your safety and well-being are of outmost importance to us! Thus, we have set up a few but important rules that we ask you to read carefully.

Examples of work environment risks at Orwak:

- Forklift traffic
- Noise
- Welding glare
- Fire

VISITOR'S BADGE AND REGISTRATION

As a guest, we want you to always wear a visitor's badge and to sign into our visitor log with your name, company and contact person at Orwak. For your safety, it is also important to know the time of your arrival and departure in the event of a fire alarm.

FIRE ALARM AND EMERGENCIES

If the fire alarm goes off, go quickly to our meeting point in the car park across the street from the main entrance. First aid supplies and a defibrillator are available at Orwak.

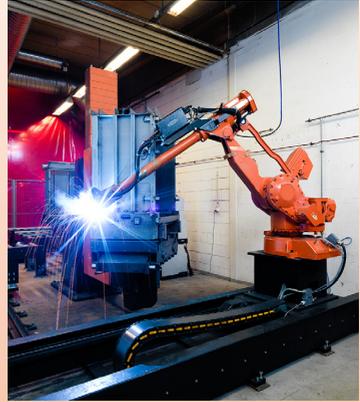

FORKLIFT TRAFFIC IN THE FACTORY

You may only enter the factory accompanied by your contact person. Follow our walking paths marked with yellow lines. In the factory, you must always wear a high-visibility vest and safety shoes. Your contact person will provide you with those protective items.

VISITING THE METAL WORKSHOP

In the metal workshop, the noise level is sometimes high and unexpected banging noises may occur. Hearing protection must be used and will be provided by your contact person.

There are several manual work stations, where the staff weld and are unable to dim the welding glare. Therefore, we ask you to never look directly into the welding arc and immediately look away, if you see that someone is about to or has just started welding.

WE EXTEND OUR WARMEST WELCOME TO ORWAK!

We hope you will enjoy the factory tour and have a pleasant visit with us!

COMPACTION SOLUTIONS FOR MOST TYPES OF WASTE

ORWAK develops solutions for sorting and recycling waste materials that improve business efficiency, contribute to a cleaner working and natural environment to provide the best total waste handling economy.

We offer an innovative range of products that promotes sorting at source and make waste management more profitable.
